

Design Changes

New Color Palette

- We need a new color palette that meets accessibility standards and is easily readable.
 - 2-3 main colors
 - Not going overboard with accent colors
- Highlight / draw attention to important information through contrasting colors.
- Use colors to group alike information.

Moving help and log out to the user drop down

- This change makes more sense and will be easier for the user to see.

Move gas and/or electric to the top of site that will control all of the widgets/tiles

- adds interactivity

Add axis labels for electric and gas

- Improves readability and accessibility

User Interaction

- Manually chosen options of average consumption / cost per household size for comparison.
- Pan and zoom feature for graph.
- Clickable graph events (pop ups, energy tips, etc.).
